Professional Summary

I’m a Computer Engineering student passionate about Python development, data analytics, and building AI-powered applications. I enjoy creating practical projects, from web applications and REST APIs to data-driven solutions, and have hands-on experience with Flask, databases, and automation. I’m eager to learn new technologies, solve real-world problems, and grow as a developer through continuous learning and practical experience.

Education

B.Tech in Computer Engineering , <i>Silver Oak University</i>	2025 – 2028 Ahmedabad
Diploma in Computer Engineering , <i>LJ University</i>	2022 – 2025 Ahmedabad

Key Skills

Programming Python, JavaScript, HTML5, CSS3	Tools & Platforms Git, GitHub, VS Code, Jupyter Notebook, Postman, Canva, Vercel, WordPress
Soft skills Problem Solving, Teamwork, Communication, Adaptability, Time Management	Languages Hindi, Gujarati, English.
Concepts AI/ML Basics, API Integration, Database Management, Data Processing	Web Scraping & Automation Selenium, BeautifulSoup
Frameworks & Libraries Flask, React.js, Pandas, NumPy, Matplotlib, Seaborn	Databases MySQL, SQLite, Supabase
Data Analytics & Visualization Power BI, Excel (Data Cleaning & Classification), Exploratory Data Analysis (EDA), Dashboard Creation	

Certifications & Courses

- Generative AI: Prompt Engineering Basics
- Version Control (Git & GitHub)
- Introduction to Python
- Programming with Scratch
- Interpersonal Skills

My ALL Certificate [🔗](#)

PROJECTS (selected)

Face Recognition System [🔗](#)

- A student face recognition app with a FastAPI backend and React frontend that lets you register students, upload or capture photos, and identify faces against stored records.

Resume Generator [🔗](#)

- A web application that helps users create professional resumes easily by entering personal, education, skills, and experience details, then generating a formatted resume automatically.

Layoff Tracker [🔗](#)

- A web application that tracks and analyzes company layoffs, helping users view layoff trends, affected industries, and employment insights through data visualization.

Wikipedia Content Fetcher [🔗](#)

A simple web application that fetches and displays Wikipedia article content based on user search queries using the Wikipedia API.

College-Event-Management [🔗](#)

A web application that helps students register for college events and enables organizers/admins to manage events, registrations, and participant details efficiently.

Job Simulations Forage

Deloitte Australia - Data Analytics Job Simulation (Forage)

01/08/2025

- Completed a Deloitte job simulation involving data analysis and forensic technology.
- Created a data dashboard using Tableau.
- Used Excel to classify data and draw business conclusions.

Tata Group - Data Analytics Job Simulation (Forage)

01/08/2025

- Completed a job simulation involving AI-powered data analytics and strategy development for the Financial Services team at Tata iQ.
- Conducted exploratory data analysis (EDA) using GenAI tools to assess data quality, identify risk indicators, and structure insights for predictive modeling.
- Proposed and justified an initial no-code predictive modeling framework to assess customer delinquency risk, leveraging GenAI for structured model logic and evaluation criteria.
- Designed an AI-driven collections strategy leveraging agentic AI and automation, incorporating ethical AI principles, regulatory compliance, and scalable implementation frameworks.
